

THE 27th CHINA HI-TECH FAIR

November 14-16, 2025 Shenzhen World Exhibition & Convention Center (Bao'an)

Promotion of Concurrent Activities

OVERVIEW

China Hi-Tech Fair (abbr:CHTF) is a large-scale international event and China's premier tech show which demonstrates innovative achievements, approved by the State Council of China. Since 1999, it has been successfully held for 26 sessions and has become an important window for China's high-tech field to open up to the outside world, as well as a premier platform for the exchange and trading of high-tech achievements.

Themed "Technology Leads Development, Industry Integrates Fusion," the 27th China Hi-Tech Fair (CHTF 2025) will take place from November 14 to 16 at the Shenzhen World Exhibition & Convention Center (Bao'an), featuring an exhibition space of up to 400,000 square meters.

At the 26th CHTF, more than 160 conference events were held, including the release of major achievements, the China High-tech Forum, the Digital Empowerment of Urban New Quality Productivity Forum, the Offshore New Energy Development Forum, the China Low-altitude Economic Industry Summit Forum, the Greater Bay Area New Power System Development Forum, and the Industry-Education Integration and Science-Education Integration Forum. These events provided a platform for communication and cooperation in different fields, showcased cutting-edge achievements, explored development trends, and achieved full-chain coordination, full-factor drive, and full-field layout of CHTF-related industries.

More than 100 companies and institutions including China Hualu Group, NIO, Pinghu Laboratory, etc.—hosted debut showcases, roadshows, and promotional activities. A series of emerging technological innovations from both domestic and international sources were showcased together. The number of new technologies, new products, and new achievements released exceeded 4,300, and 869 supply-demand matching projects were signed on-site.

The 27th CHTF will also provide platforms for communication and cooperation in different fields, display cutting-edge results, explore development trends, focus on addressing the pain points and difficulties faced by enterprises, and support the rapid growth of technological innovation, to achieve full-chain collaboration, all-element drive, and full-field layout for industries related to the CHTF.
